

INSTRUCTIONS FOR MAINTAINING GARMENTS

Dear Customer,

The fabric of our garments is made to be used in your sector, but it is still fabric, and as such it must be treated with care EVEN DURING USE so that it lasts as long as possible.

To maintain the fabric, you must treat it as follows:

- We recommend that you wash the garment once before use as this helps to remove electrostaticity
- If it is a dark-coloured garment, wash with the appropriate detergent
- Wash in the synthetic cycle according to the temperature indicated on the label and make sure that there are no materials that can tear the fabric (eg., close zips)
- **Wash garments on their own (do not mix them with towels, etc.),** using the fast cycle
- NEVER apply bleach directly to the garment (max 5% diluted in water)
- Keep on a low spin speed
- Do not rub when washing by hand
- Hang the wet garment without using clothes-pegs, it will dry quickly and will look practically already ironed
- Always iron the garments on the reverse to avoid giving them a "shiny" effect
- **The garments should be washed at least 2-3 times a week to remove hairspray and other products. In order to prevent pilling, even if you have only purchased one for each user (THE FABRIC DOES NOT RUIN IN THE WASHING MACHINE), USE FABRIC SOFTENER**
- We recommend that you always purchase at **least 2 garments per user or alternate with other uniforms already in your possession, so as not to subject the garments to stress, rubbing and heat from the hair dryer,** to prevent pilling
- Do not allow the heat of the hair dryer to be in direct contact with the garments
- Do not insert iron brushes or other sharp objects into the pockets
- Avoid continuously rubbing the fabric against rough surfaces
- **Avoid catching the fabric on corners or attaching pegs or tweezers so as not to pull threads**
- **IF PILLING SHOULD OCCUR, REMOVE USING A PILLING REMOVAL DEVICE AND THE GARMENT WILL BE AS GOOD AS NEW**

These methods have already been tested by our suppliers, by us, and by all of our customers. **WE CANNOT**

RESPOND TO QUERIES RELATING TO DAMAGE / DEFECTS CAUSED BY A USE WHICH IS DIFFERENT TO THE PRESENT INSTRUCTIONS, however we are available to clear up any doubts or provide clarification.

Yours sincerely,

STUDIO7 CREATIONI
